American TCB
6731 Whittier Ave., Suite C110
McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a Class II Permissive Change approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a Class II Permissive Change approval of the Intel PRO/Wireless 2915ABG Network Connection (MN: WM3B2915ABG, FCC ID: PD9WM3B2915ABG), which is a WLAN adapter (802.11a, 802.11b and 802.11g). It was tested externally to a computer chassis with a set of Glacier Antennas continuously transmitting and receiving from the Main and Aux antenna ports.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas", written over a white rectangular background.
