

Chapter 1. Installation

1.1 Connection

1.2 Notices

1.1 Connection

Total Biometric Solution Provider

* Connect the connectors like the upper picture.

- 1. Don't change the USB port after the first installation into the user PC.
- You must connect cables while the power of PC is OFF and the eNBio Gate power is also OFF.
- 3. You have to install the eNBio Gate in the place without strong backlight. It can make the camera movement error.
- 4. Don't disassemble eNBio Gate without NITGEN's approval. If do, you cannot have the A/S from us.
- 5. CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Class B digital device or peripheral

- NOTE: this equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
- ☐ If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
