RE: Xetawave, LLC (Grantee Code: PEJ)  
Request for Limited Modular Approval (LMA)

To: Elite Electronic Engineering:

This letter is to address concern regarding the compliance of our MSD9 limited modular transmitter, FCC ID# PEG-93829283-MSD9, with the requirements of FCC Public Notice DA 00-1407, Part 15 Unlicensed Modular Transmitter Approval, released June 26, 2000.

**FCC Notice:** “If compliance with one or more of the numbered requirements, listed above, cannot be demonstrated, it may be possible to obtain a “Limited Modular Approval” (LMA). This will be issued in those instances where the Grantee can demonstrate that it will retain control over the final installation of the device, such that compliance of the end product is assured. In such a case, an operating condition on the grant of equipment authorization for the module would state that the module is only approved for use when installed in devices produced by a specific manufacturer, typically the Grantee. If LMA is sought, the application for the equipment authorization must make this fact clear. It must also specifically state how control of the end product, into which the module will be installed, will be maintained, such that full compliance of the end product is always ensured.

**Xetawave Response:** Xetawave confirms that it will exercise control over the final installation of this module, such that compliance of the end product is assured. To do so, Xetawave has instructed its sales department personnel to make sure that devices, in which the MSD9 wireless data transceivers are installed in, will not be available for sale to the general public. These instructions will be given in writing to sales personnel, who will be required to respond to the instructions with a written acknowledgment.

In addition, Xetawave will provide its customers with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

Xetawave confirms that the MDS9 limited modular transmitter will only be installed in the devices produced by Xetawave, LLC.

Respectfully submitted,

Robert Campbell,  
COO  
Xetawave, LLC
