

A photograph of a laboratory or industrial chamber. The chamber's interior wall is covered in a grid of black cross-shaped perforations. In the center, a wooden stand holds a white cylindrical component with a thin vertical rod extending upwards. A white label with the text 'B50102' is attached to the stand. The floor is a smooth, grey surface with yellow and black safety markings.

B50102

The image shows a laboratory or testing environment. In the foreground, a rectangular wooden block sits on a circular base. A white sign with the alphanumeric code 'B50102' is attached to the front of the block. On top of the block is a white sensor assembly consisting of a vertical pole with a circular sensor head. The background features a wall with a grid of black cross-shaped markers. To the left, there is a doorway leading to another area. The floor is a light-colored, polished surface with yellow and black safety tape markings.
