Dear Andy:

On behalf of Sewon Telecom is our amendment response to your e-mail dated July 13, 2001 requesting additional information for the subject application.

1. The Unmodulated Carrier reference listed in the SAR test data tables is intended to show that the SAR measurements were performed in AMPS mode with unmodulated carrier. For future SAR reports we will list the mode as AMPS in the data table instead of Unmodulated Carrier.

We trust this information is sufficient response to your question. If you have any further questions or comments, please do not hesitate to contact me.

Sincerely,
