

Subject: Application Biotronik, Inc.
FCC ID: PG6RUCM200

Spurious Radiated Emission Location

This is to confirm that Appendix E, containing spectrum plots, can be found in part 2 of the test report "RUCM200 TestRpt 2_rev.pdf" pages 25 to 69. The bandwidth is included on each plot and the amplitude reported is EIRP as determined using the substitution method.

Spurious Emissions at Antenna Terminal

This is to confirm that the antenna is permanently attached and the transmitter does not provide any connector for antenna spurious emissions measurements.
