Installation Guide For UAT ADSL PCI Modem Hardware Installation

Familiarizing yourself with your ADSL Board

Your ADSL board only has one RJ-11 connector for data connection. POTS splitter or microfilters can be plugged outside form the board using multiple port phone jacks.

Bracket

Installing the ADSL Board

To install the board

- 1. Switch off your computer and all the attached devices
- 2. Touch a metal part of your computer to ground yourself.
- 3. Remove the computer cover.
- 4. Locate a free PCI slot on the computer motherboard, remove the metal plate from the slot and put the screw aside
- 5. Align the ADSL Board with the PCI slot and insert the board as shown
- 6. Secure the ADSL Board to the PCI slot with the screw which was removed from the metal plate
- 7. Connect your ADSL Board to your wall's telephone jack which is connected to your ADSL service.
- 8. Replace the computer's cover
- 9. Plug the power cord into the power outlet and switch on the computer.

Driver install for Windows 98

To install UAT PCI device drivers for Windows 98:

- 1. Start Windows 95/98 on your computer with the PCI board installed
- 2. Windows 95/98 will open a window called "Add New Hardware Wizard" to indicate that it found a " PCI ATM Controller" board

PCI ATM Controller A device driver is a software program that makes a hardware device work.
\$

3. Click "Next " then select the bullet next to "Display a list of all the drivers..."

What do you want Windows to do?
 Search for the best driver for your device. (Recommended).
Display a list of all the drivers in a specific location, so you can select the driver you want.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measure:

≤ ≤ Reorient or relocated the receiving antenna.

≤ ≤ Increase the separation between the equipment and receiver.

✓ Connect the equipment into a different outlet circuit from than the receiver.
✓ Consult an experienced radio/TV technician for help.

CAUTION: Any changes of modifications not expressly approved by the grantee of this device could void the users authority to operate the equipment.
