Dear Sir/Madam,

Re: Description of Modifications for Class II Permissive Change

The items listed below represent the modifications made to the Energy-saving lamps (FCC ID no. PGE-BH4) as applicable to this request for a Class II Permissive Change:

1. Just adding a new model XEU48-18U, the lamp wattage is 18W;
2. Sharing the same PCB layout and schematic diagram with the original family (FCC ID no. PGE-BH4);
3. Different wattage results in some different components value.

Sincerely,

Client's signature:
