RE: FCC ID: PGR2W2700ATH\_ATCB002577

1. Please note that the device is more than sufficiently large to contain the required statement of 15.19. Please note that this statement can be on a separate label than the FCC ID label, but does need to be on the device as specified in 15.19(a)(3) (i.e. "All other devices shall bear the following statement in a **conspicuous location on the device**"). Please provide a label with the required statement, and please show where on the device this statement in 15.19 will be located.

**Response: The device does not have space. The top and bottom covers have openings to allow airflow for cooling purpose. This is the reason why a label, per 15.19(a)(3), was not placed on the unit.**

2. Please note that the application forms state 4 variant models. However, the report only shows 1 model number. Please explain how these other models fit under this application.

**Response: The hardware is the same for each model. The only difference is the software version.**

Regards,

A handwritten signature in black ink that reads "Juan Martinez".
