Columbia, MD 21046

Attn: OET Dept.
Re: Correspondence Number 44112

To Whom It May Concern:

This letter is to address the issues delineated in Correspondence Number 44112 on July 24, 2013.

Attached please find the updated operational description and antenna performance exhibit. These exhibits were prepared on the company letter head with authorized applicant's signature.

In regards to the label attachment, the Pace Model 405 Wireless Video Bridge does not use screws to attach the label.

The label is permanently attached to product enclosure using a pressure sensitive adhesive process.

Attached, please find the updated label location drawing (see note 1) for reference. For additional information please reference the labelling process listed under the UL labelling requirements for a Category Control Number of PGJ12 (Pressure sensitive system, label and thermal transfer ribbon DPW5000 or VIT "3070".)

Sincerely,

A handwritten signature in black ink that reads "Mark A. Rieger".
