Re: FCC ID: PGRC61W  
Subject: Transmit Power Control Declaration

To Whom It May Concern:

We, ARRIS, declare that that the Model: C61W-700 operates only as a client (STA) device and meets all, including the Transmit Power Control (TPC) requirements for operating in the 5.25-5.35 GHz band and the 5.47-5.725 GHz band as specified in Title 47 Part 15.407 (h)

The current software and associated drivers support Transmit Power Control (TPC) as required per § 15.407(h) which are built into the device firmware.

Sincerely,

A handwritten signature in black ink that reads "Mark A. Rieger".
