Attn: Mr. Martin Perrine

SUBJECT: Axesstel Inc.
FCC ID: PH7AXWL800
731 Confirmation No.: TC425277
Correspondence Reference No.: 23298
Request for Tech. Info.: 09/23/05

Dear Martin:

Transmitted herewith, on behalf of **Axesstel Inc.** is an amendment provided in response to the request for technical information dated September 23, 2005.

1. We agree that references to "body-worn" operating conditions on the grant seem inapplicable. We have been including this language for these devices based on an original grant for this applicant issued by the FCC on 05/21/2001 (copy attached). In the future, we would propose using the following grant condition:

Power output listed is ERP. SAR compliance for portable configurations is based on a minimum separation distance of 2.5 cm between the unit and all other persons during normal use operation. End-users must be informed of the portable operating requirements for satisfying RF exposure compliance. The highest reported SAR values are: Body-worn: XXX w/kg.

2. We have updated the Grant of Authorization for this application to reflect this change.

We trust this information is sufficient to resolve FCC questions in this application. If you have any further questions, please do not hesitate to contact us.

Randy Ortanez
President

cc: Axesstel Inc.

GRANT OF EQUIPMENT
AUTHORIZATION
Certification

Axesstel Inc
6480 Weathers Place Suite 300
San Diego, CA 92121
United States

Date of Grant: 05/21/2001

Application Dated: 04/10/2001

Attention: D.S. Kim , Product Manager

NOT TRANSFERABLE

EQUIPMENT AUTHORIZATION is hereby issued to the named GRANTEE, and is VALID ONLY for the equipment identified hereon for use under the Commission's Rules and Regulations listed below.

FCC IDENTIFIER: PH7ACWP800

Name of Grantee: Axesstel Inc

Equipment Class: Licensed Non-Broadcast Station Transmitter

Notes: CDMA WLL Phone

<u>Grant Notes</u>	<u>FCC Rule Parts</u>	<u>Frequency Range (MHZ)</u>	<u>Output Watts</u>	<u>Frequency Tolerance</u>	<u>Emission Designator</u>
	22.901(d)	824.7 - 848.31	0.345	2.5 PM	1M25F9W

Output is ERP. SAR compliance for body-worn operating configurations is limited to the specific configuration tested for this filing. Body-worn operations must provide at least 2.5 cm separation between the device, including its antenna whether extended or retracted, and the user's body. End-users must be informed of the body-worn operating requirements for satisfying RF exposure compliance. The highest reported SAR values are: CDMA modes (Part 22) - Body-worn: 1.44 W/kg
