Subject: Re: FCC Equipment Authorization System

Dear PCTEST,

Thank you for your cooperation.
Please check the below responses.

1) Photos, op desc, user manual seem unclear for info about headset ("ear-mic.") - please provide info about intended or expected accessories.

==> We'll send you the updated manual and operational description soon.

2) SAR test info seems unclear whether headset was connected - please explain and/or revise if appropriate

==> We indicated this configuration in the SAR report page 20~23 of 26. [File name: ATT. N (SAR REPORT)_MV140_Rev.3]

Headset was connected in CDMA mode or PCS CDMA mode for making a voice call.
But headset wasn't connected in EVDO mode. Because it's for just data connection.

If you have more questions, please let me know.

Best Regards,
SunHee Kim
