

September 3, 2008

Dear FCC,

Two of the exhibits originally uploaded for this application were in error. The method of measuring RF power was determined to be incorrect by the test lab after issuance of the original grant. The revised report correctly documents the measurement method in accordance with the FCC DTS guide. The Grant power has been revised and updated RF and SAR reports have been uploaded. Please supersede the original RF test report and SAR test report for this DTS application.

Please contact me if you have any questions.

Best regards,

Chris Harvey
