

Clarification for PG131N USB Interface

To whom it may concern,

PG131N model is a Non-Data service model based on current chipset platform. About PG131N's USB Interface, it's only used to do after service maintenance by engineers, and has NO other function with regard to end user. data exchange with a computer is only possible with special software or hardware by service engineer. There is no USB data exchange, if the end user connect a PC to the device.

Sincerely yours,

A handwritten signature in black ink that reads "David Kim". The signature is written in a cursive, slightly slanted style.
