## **1 General Introduction**

Thank you for choosing the Axesstel GSM PG130/131N Desktop Phone. Please read this user manual carefully before using your phone .

The phone has been designed to operate with the latest digital communication technology - GSM. The phone provides the following advanced features:

- 128x48 LCD with backlight, easy to read
- Status Indicators
- Two-way SMS, voice mail
- Call Divert, Call Waiting, Three-Way Calling, Call Barring
- Emergency call
- Menu driven interface for easy operation and configuration
- Store 200 contacts
- Save 200 SMS
- Last call redials
- Choice of 15 ring tones and 10 power On/Off musical tones
- Adjustable ring and voice volume
- AC power supply
- Indoor antenna (Outdoor antenna is optional)
- Speaker phone for hands-free operation
- User friendly keypad
- Battery provides long stand-by and talk time
- Easy to service and repair

## **2 Important Information**

- The product can only be installed indoors.
- Do not place the phone near high temperature objects, under direct sunlight, near source of water, near fire or near inflammable and explosive materials. Avoid using the phone in high temperature or humidity.
- The phone may interfere with heart pacemaker, hearing aid and other electronic medical devices. Therefore please follow the instructions given by your equipment suppliers or consult your doctor. Turn your phone OFF in health care centers if any regulations posted in the area instruct you to do so. Hospitals or health care centers may be using equipment that may be sensitive to external RF energy.
- Place the phone away from other electronic devices like TV and Radio to avoid interference.
- Keep the product away from magnetic field and static electricity.
- Place the phone out of the reach of small children.
- Do not attempt to reassemble the phone by yourself. Only authorized personnel should service the phone and its accessories. Faulty installation or service can be dangerous and may invalidate the warranty.
- Do not clean the phone while in operation. Before attempting to clean the phone, turn the phone off, disconnect the external power adapter and take out the battery. Use a dry, soft cloth for cleaning. Do not use liquid or aerosol cleaners.
- Do not drop, knock or shake the phone. Rough handling may break the phone body and internal circuit boards.
- Do not use the phone if the antenna is damaged. Replace the damaged antenna immediately by using a qualified technician. Use only a manufacturer approved antenna. Non-approved antennas, modifications or attachments may impair call quality and damage the phone.
- Do not hold the antenna during operation. This may affect call quality and cause the phone to operate at unintended power levels.
- Keep the antenna free from obstructions and position the antenna straight up. This will ensure best call quality.
- Only use the battery and the power adapter approved by the manufacturer. If not, it may cause an explosion or result in a short circuit.
- It is highly recommended to fully charge the battery before initial use. The battery might have been discharged during storage and delivery.
- Do not throw battery. Batteries are not to be disposed off by putting them in fire. It may explode or catch fire.
- The power adapter must be used within the specified AC voltage range.
- Take out the battery if you won't use your phone for a long time and keep the battery well.
- During lightning, do not touch the power plug. It may result in an electric shock or death.
- Do not touch the plug with wet hands. Always grasp and pull the plug, not the cord. Do not put heavy things on the power cord or bend it too much.
- During daily use, do not pull out the power adapter. The battery is used for backup power, which will not cause the increased consumption of electricity.
- Don't use the power adapter if the power cable is damaged. Contact the maintenance center immediately and replace the adapter.

### 3 Product Overview

#### 3.1 Packing List

Once you open the product package, please check the packing list to make sure there is no part missing. If any part is missing or broken, please contact customer service. The packing list is as follows:

- |                  |            |
|------------------|------------|
| 1. Main Unit     | 2. Handset |
| 3. Antenna       | 4. Battery |
| 5. Power Adaptor | 6. Manual  |
| 7. Data Cable    |            |

## **3.2 SETTING UP YOUR PHONE**

## 4 Basic Operations

### 4.1 Power On/Off

Connect the handset to the underside of the phone, then open the battery door and connect the battery. Plug in the power adapter into AC outlet, and then connect the other end of the power adapter into the right side of the phone.

Switch the **<Power>** switch (on the underside of the Phone) to **ON**, then press the **<Power On/Off>** Key on the panel for 3 seconds to power on the phone, your phone should go to standby screen and is ready to use.

You can turn the phone off directly by switching the **<Power On/Off>** switch (on the rear of the phone) to **OFF** position. If the phone will not be used for long time, please turn this switch to **OFF**. Or you can press the **<Power On/Off>** Key for 3 seconds to power off the Phone.

Note: Before press the Power ON, please turn the hardware switch to ON which in the bottom side of the phone.

### 4.2 Make a Call

While your phone is power on and at idle screen, enter a destination number you wish to call and then press **<Redial>** Key. (Note: To modify digits you enter, you can press **<CLEAR>** Key to delete wrong digits first and then enter new digits). Once the call is connected, the phone's screen will display the number you have dialed, and the time duration the call has lasted.

The phone also has a speaker. To use the speaker to make a call, press **<SPEAKER>** Key, enter a phone number, and press **<REDIAL>** Key.

### 4.3 Answer a Call

When there is an incoming call, the phone will ring and display the Phone number of the incoming call (if the number is available). You can pick up the handset or press **<SPEAKER>** Key to answer the incoming call. The ring tone and ring-tone volume can be changed in the sounds menu.

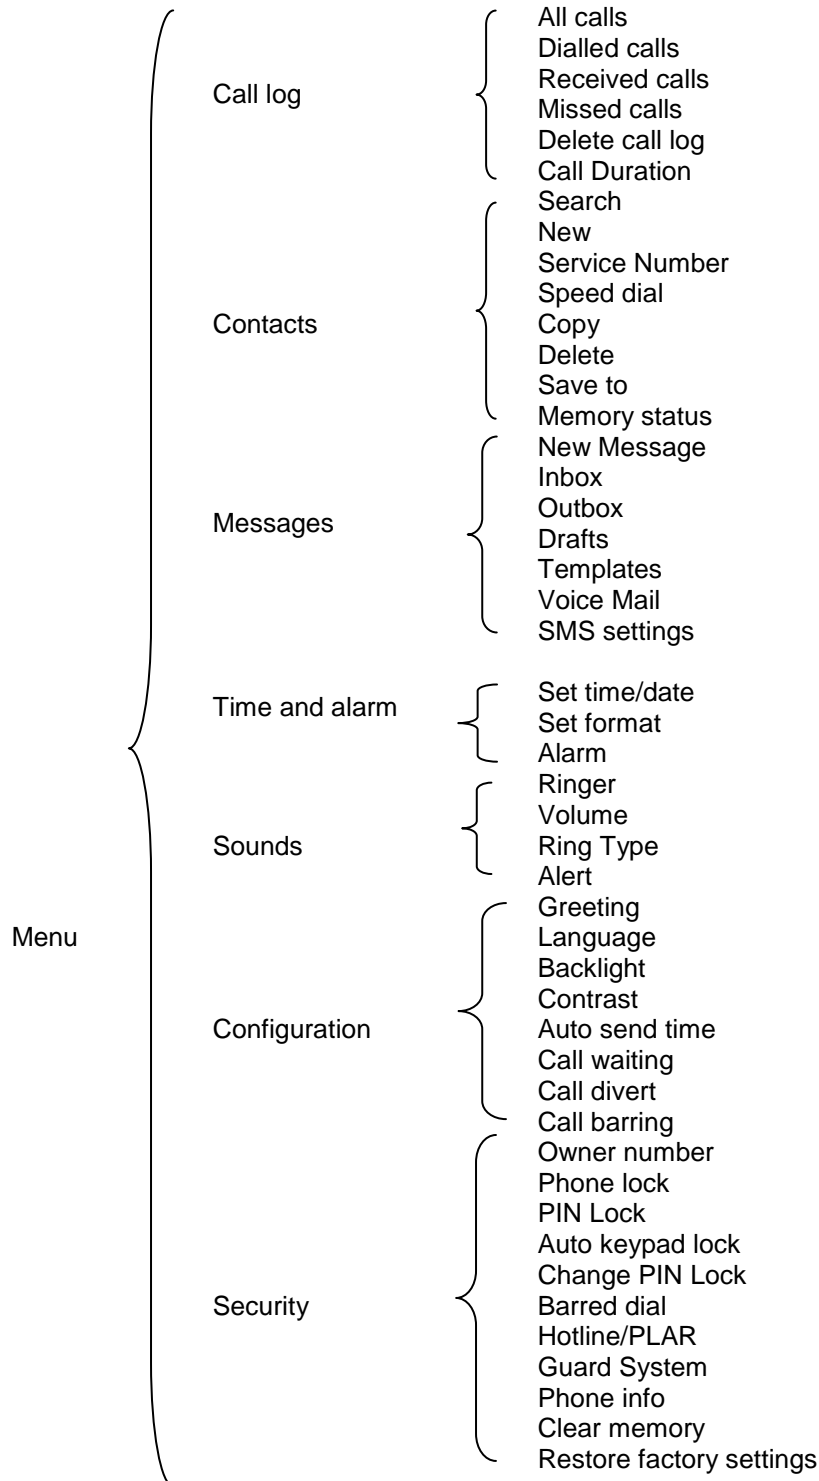

### 4.4 End a Call

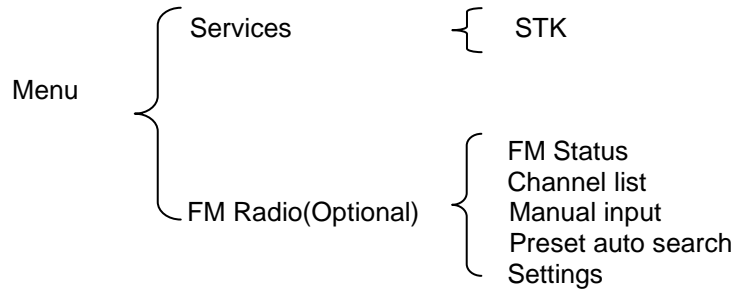

You can end a call by pressing **<Clear>** KEY to select **End**. If you are using the handset for a phone call, hanging up the handset will end the call automatically.

## 5 Main Menu

- 1) Press <<MENU> KEY to enter the main menu from the idle screen. The main menu includes: Contacts, Messages, Recent Calls, Tools, and Settings. The menu tree is as follow:

#### FCC Section 15.21 Information to the user

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### FCC Section 15.19 Labelling requirements

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

#### SAR INFORMATION

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue.

Device types (FCC ID: PH7PG131N ) has also been tested against this SAR limit.

The highest SAR value reported under this standard during product certification for the body is **1.413** W/kg.

This device was tested for typical body-worn operations with the back of the handset kept 0 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0 cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
