1 General Introduction

Thank you for choosing CDMA Fixed Wireless Phone of Axesstel. To use your phone well, please read this user manual carefully before you use.

The phone has been designed to operate with the latest digital communication technology - Code Division Multiple Access (CDMA). The phone provides the following advanced features:

- ✧ Large LCD with backlight, easy to read
- ✧ Status Indicators
- ✧ Two-way SMS, voice mail and caller ID
- ✧ Call Forwarding, Call Waiting, Three-Way Calling and Do not disturbing
- ✧ High speed packet data dial-up Internet service (Only available for PX300N, not for PX1x0N)
- ✧ PC Fax
- ✧ Emergency call
- ✧ MENU driven interface for easy operation and configuration
- ✧ Store 200 contacts in phone
- ✧ Save 200 SMS in phone
- ✧ Last call redials
- ✧ Choice of 13 ring tones
- ✧ Adjustable ring and voice volume
- ✧ AC power supply
- ✧ Indoor antenna (and Outdoor antenna is optional)
- ✧ Speaker phone for hand-free operation
- ✧ Call privacy is also supported by CDMA technology
- ✧ Long battery stand-by and talk time
- ✧ User friendly keypad
- ✧ Easy to service and repair

2 Important Information

- ✧ The product can only be installed indoors.
- ✧ Do not place the phone near high temperature objects, under direct sunlight, near source of water, near fire or near inflammable and explosive materials. Avoid using the phone in high temperature or humidity.
- ✧ The phone may interfere with heart pacemaker, hearing aid and other electronic medical devices. Therefore please follow the instructions given by your equipment suppliers or consult your doctor. Turn your phone OFF in health care centers if any regulations posted in the area instruct you to do so. Hospitals or health care centers may be using equipment that may be sensitive to external RF energy.
- ✧ Place the phone away from other electronic devices like TV and Radio to avoid interference.
- ✧ Keep the product away from magnetic field and static electricity.
- ✧ Place the phone out of the reach of small children.
- ✧ Do not attempt to reassemble the phone by yourself. Only authorized personnel could service the phone and its accessories. Faulty installation or service can be dangerous and may invalidate the warranty.
- ✧ Do not clean the phone while in operation. Before attempting to clean the phone, turn the phone off, disconnect the external power adapter and take out the battery. Use a dry, soft cloth for cleaning. Do not use liquid or aerosol cleaners.
- ✧ Do not drop, knock or shake the phone. Rough handling may break the phone body and internal circuit boards.
- ✧ Do not use the phone if the antenna is damaged. Replace the damaged antenna immediately by a qualified technician. Use only a manufacturer approved antenna. Non-approved antennas, modifications or attachments may impair call quality and damage the phone.
- ✧ Do not hold the antenna during operation. This may affect call quality and cause the phone to operate at unintended power levels.
- ✧ Keep the antenna free from obstructions and position the antenna straight up. This will ensure best call quality.
- ✧ Only use the battery and the power adapter approved by the manufacturer. If not, it may cause an explosion or result in a short circuit.
- ✧ It is highly recommended to fully charge the battery before initial use. The battery might have been discharged during storage and delivery.
- ✧ Do not throw battery. Batteries are not to be disposed off by putting them in fire. It may explode or catch fire.
- ✧ The power adapter must be used within the specified AC voltage range.
- ✧ Take out the battery if you won't use your phone for a long time and keep the battery well.
- ✧ During lightning, do not touch the power plug. It may result in an electric shock or death.
- ✧ Do not touch the plug with wet hands. Always grasp and pull the plug, not the cord. Do not put heavy things on the power cord or bend it too much.
- ✧ During daily use, do not pull out the power adapter. The battery is used for backup power, which will not cause the increasing consumption of electricity.
- ✧ Don't use the power adapter if the power cable is damaged. Contact the maintenance center immediately and replace the adapter.

3 Product Overview

3.1 Packing List

Once you open the product package, please check the packing list to make sure there is no part missing. If any part is missing or broken, please contact the customer service. The packing list is as follow:

5		Alarm on
6		Mute
8		No UIM card
9		Unread message
10		Roaming

Figure 3 Display Icon

4 Basic Operations

4.1 Installing UIM card

1. Remove UIM bracket cover.
2. Insert proper UIM card.
3. Close the cover.

4.2 Power On/Off

Connect DC power supply to the “DC IN” port or insert the battery to the battery chamber. Switch the “Power” switch (on the rear of the Phone) to ON, then press the Power On/Off Key on the panel for 3 seconds to power on the phone---if the DC power is in and the phone will power automatically, your phone should go to standby screen and is ready to use.

You can turn the phone off directly by switching the “Power ON/OFF” switch (on the rear of the phone) to OFF position. If the phone will not be used for long time, please turn this switch to OFF. Or you can press the Power On/Off Key for 3 seconds to power off the phone.

4.3 Make a Call

While your phone is power on and at standby screen, enter a destination number you wish to call and then press **<Redial>**Key. (Note: To modify digits you enter, you can press**<CLEAR>** Key to delete wrong digits first and then enter new digits).

Or you can press **<Contacts>** key to enter contacts menu, **<1 View>**, **<Volume + ->**,**<OK>** to select the contacts list:**<1 UIM Contacts>**,**<2 Phone Contacts>**, or **<3 Search Name>** to search the desired name, press **<Volume+>** to scroll to the desired number then press **<Redial>**Key .Once the call is connected, the phone's screen will display the number you have dialed, and the time duration the call has lasted.

The phone also has a speaker. To use the speaker to make a call, press **<SPEAKER>** Key, enter a phone number, and press **<Redial>** Key.

4.4 Answer a Call

When there is an incoming call, the phone will ring and display the phone number of the incoming call (if the number is available). You can pick up the handset or press **<SPEAKER>** to answer the incoming call. The ring tone and ring-tone volume can be changed in the setting menu.

Note: When the ring volume is set to 'Slient', the phone does not ring. Only the "Incoming call" message blinks.

4.5 End a Call

You can end a call by pressing **<POWER>**. If you are using the handset for a phone call, hanging up the handset will end the call automatically.

5 Main MENU

Press Left Soft Key Key to enter the main MENU from the standby screen. The main MENU includes: Contacts, Messages, Recent Calls, Tools, and Settings. The MENU tree is as follow:

12 Quick Troubleshooting Guide

- ✧ Unable to send/receive data/fax calls: Check the connections to computer and verify that necessary software has been properly installed and configured.
 - ✧ Moisture or ventilation problems: Visually inspect the phone body, moisture can damage the phone. Ventilation is also very important. Move the phone to improve the ventilation as necessary.
 - ✧ No power: Verify that AC power source and its corresponding circuit breaker are functioning properly.
 - ✧ If Phone can't make data connection:
 - ✓ Make sure to follow Modem installation procedures
 - ✓ Make sure that you have purchased CDMA1x service from your CDMA service provider
 - ✓ Make sure that both PC's modem driver and proper software are installed correctly
 - ✧ Unable to receive incoming calls:
 - ✓ Make sure that the incoming call is not restricted;
 - ✓ Make sure the FAX/DATA mode setting is OFF
 - ✓ Make sure that your Phone is having good signal reception
 - ✧ Unable to make outgoing calls:
 - ✓ Make sure that the numbers you dialed are not restricted;
 - ✓ Make sure that your Phone is having good signal reception
 - ✧ Unable to receive SMS: Make sure that your Phone's memory is not full for storing SMS. If the memory is full, please empty inbox.
 - ✧ While charging the battery, DON'T disconnect the charger before the battery is fully charged.
- REMEMBER: You can always use **Load Default** sub-MENU in **Security** MENU to restore all original phone settings.

FCC Section 15.21 Information to the user

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Section 15.19 Labelling requirements

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

SAR INFORMATION

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue.

Device types (FCC ID: PX120N) has also been tested against this SAR limit.

The highest SAR value reported under this standard during product certification for the body is 0.408 W/kg.

This device was tested for typical body-worn operations with the back of the handset kept 0 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0 cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
