

Clarification for PX320N USB Interface

To whom it may concern,

PX320N model is a Non-Data service model based on current chipset platform. About PX320N's USB Interface, it's only used to do after service maintenance by engineers, and has NO other function with regard to end user. data exchange with a computer is only possible with special software or hardware by service engineer. There is no USB data exchange, if the end user connect a PC to the device.

Sincerely yours,

A handwritten signature in black ink that reads "David Kim". The letters are cursive and somewhat slanted to the right.
