Change in Identification

To whom it may concern,

LightPointe is requesting a change in identification for our AireLink 80 10G product. The original identifier is 2AIXT-PPC-10G-E with an original grant date of 07/07/2017. LightPointe has entered into an OEM agreement with Elva1 to create a LightPointe branded product. The difference between the two systems is the branding of the software and exterior labels. Elva1 will not be making any changes to the form, function, or RF characteristics for the LightPointe version of the product. This means that the original test results continue to be representative of and applicable to the system.

Best Regards,

A handwritten signature in black ink, appearing to read 'Heinz Willebrand'.
