Subject: Response to Inquiry to FCC (Tracking Number 770319) (TCB)

Inquiry:

In the past we have had other interpretations regarding peak power under Part 27 and Part 90. Generally the FCC has indicated that peak power is required. We have an application currently under review that has justified a method they have provided. Please see comments/response attachment item 2) for complete discussion of the methodology. Additionally we have provided the original test report.

Please note that this is the last item we are trying to resolve before starting the permit but ask submittal on this application.

Thank You,

Tim Johnson

Response:

power measurement method is acceptable for this filing

if application will contain SAR report, to support SAR results please also include data for source-based time-averaged output power
