Subject: RE: new TCB application

Good morning sir,

I have reviewed the attached information for all of the necessary administrative documentation, and have found the following:

1. FCC Label Location - I did not find a photo, or engineer's drawing, of the device showing the location of the FCC label on the device.
2. FCC Identification Label - Where you have the FCC ID, and the format of it, on the "label plate" is fine. However, we either need a revised copy of this label plate showing the correct ID now that you have a grantee code for TDK (no XXXs), or another copy of the same label plate with a statement on the side of that label plate stating that "FCC ID:XXXBT-ULTRA will be replaced with FCC ID:PI4BT-ULTRA".
3. Statement pursuant to Section 15.19 of the FCC Rules and Regs - I did locate this statement in the User's reference guide/manual. However, the FCC's rule is that if the device is larger than your palm, than there is room for this statement on the device (most include it on the identification label).
4. Confidentiality - Should you desire the schematics and block diagram to be held confidential, you must submit a written request. You must specify the FCC identifier, the FCC Rule Part that refers to confidentiality, and the items to be held confidential. Please refer to the application package attachment for an example.
5. Manual - Is the User's reference guide the user's manual.
6. Manual user's information - I could not locate the statement pursuant to Section 15.21 of the FCC Rules & Regs in the manual. A copy is attached.
7. Service agreement - A copy is attached. It is policy of the TCB process to have one signed by each manufacturer. Please have TDK sign and return to us.

Chris,

attached the file with the TDK documents.

We have not yet finished the FCC test reports. This will be done in the next week. You can already start with the administrative review. Thanks

I will be out of the office next week until Wednesday (in Moscow for type

approval).

Best Regards

Torsten

Torsten, if you can get the Test Report and Users Manual information to me today, will attempt to get Greg to review them today. Otherwise the technical review may need to wait a few days. Please let me know if this is possible (you can follow up with the administrative paperwork, such as the authorization letters, confidentiality letters, labels, TCB Contract, Schematics, Block Diagrams, etc. tomorrow to complete the application).

Best regards,

Chris Harvey
