RE: Airspan Networks (Israel) Ltd.

FCC ID: PIDAIRSPAN-SPR19

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The wealth of information provided in reference to previous comment 9 (as given below) does not appear to contain the information requested. Kindly point to where this information may be found in the document provided, or provide a new exhibit as necessary.

It does not appear that a description of all circuitry and devices provided for determining and stabilizing frequency, for suppression of spurious radiation, for limiting modulation, and for limiting power was provided.

- 2) Is the information regarding previous comment 11 currently available?

FYI....This type of system in the PCS band appears unique. In these instances, the FCC typically has asked for a list of expected providers. If possible, please provide.

Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
