Subject: Application for Class II changes certification of the base station transceiver,
FCC ID:PIDMMAX3605

Dear Gentlemen,

Please find attached our application for Class II changes certification of the base station transceiver, FCC ID:PIDMMAX3605, model name MacroMAXe 3605 3.7G Ext, prepared in accordance with FCC Rules, parts 2 and 90, operating frequencies 3652.5-3697.5 MHz.

The MacroMAXe 3605 was tested in the frequency range of 3650-3700 MHz, due to the fact that for the 3675-3700 MHz frequencies the FCC requests for support of Unrestricted Contention Based Protocol, we certified at that time only for the lower band 3652.5 – 3672.5 MHz.

The new MacroMAXe 3605 software supports the Unrestricted Contention Based Protocol, therefore we would like also to certify the upper band 3675-3700 MHz and to get certification for the complete 50 MHz.

The product testing and this application for certification were performed by Hermon Laboratories, which is listed by FCC (Registration Numbers 90623, 90624).

Hermon Labs responsible person is Mr. Michael Nikishin, EMC and Radio group manager, tel: 011 972 4626 8440, fax:011 972 4628 8277, e-mail:nikishin@hermonlabs.com.

We hope this application satisfies your requirements.

Sincerely yours
