

ID Label and Location Information

The proposed location for the label is shown in an accompanying sketch. The proposed label will be an integral part of the shrink tubing that covers the product. The lettering will be on the reverse side from the camera location. Permanence, contrast, and durability of the lettering will be in accordance with MIL-STD-130. The typeface will be either 10 or 12 point.

There is insufficient space on the product for the required labeling statement of 47CFR15.19(a)(3). In accordance with the following paragraph of the FCC Rules, this statement is prominently displayed in the manual that will be packed with the product. A copy of that manual is attached to this submission.
