### 3: SET UP

#### A. REMOTE CONTROLLER BATTERY INSTALLATION

- Unscrew the battery cover with a Phillips head screwdriver (not included).
- Install 2 AA (LR6) 1.5V alkaline batteries (not included) with polarity (+/-) as shown inside the battery compartment. For longer life, use alkaline batteries.
- Replace battery cover and tighten screw.
- Replace batteries in the remote controller if the wheelchair does not respond well after a recharge.

x2

AA (LR6) 1.5V

#### B. CHARGING THE WHEELIE CHAIR

The wheelchair is powered by a permanently installed Lithium-Ion (Li-Ion) battery, and it must be fully charged before first use.

- Switch off the wheelchair chair by sliding the power switch to OFF (O).
- Connect one end of the charge cord to the wheelchair chair's charge port and plug the other end in to a 5V/1000 MAH USB charger (not included).
- A red LED will light up on wheelchair chair as it is charging.
- The red LED will turn green when the wheelchair chair's battery is fully charged. A full charge will take approximately 60 minutes (charging time may vary). Unplug the cord when charging is complete.
- Recharge the wheelchair chair if its LED rapidly flashes then goes off or if the wheelchair chair begins to respond slowly.

Low battery

Wheelie chair is charging

Green

Wheelie chair is fully charged

**TIPS:**

- Power switch must be in the OFF (O) position when charging the wheelchair chair.
- Charging the battery for more than what is recommended will not give you a longer running time.
- The battery will be hot after play. Wait at least 10 to 15 minutes until the battery cools down before recharging the wheelchair chair.

#### C. PAIRING THE REMOTE CONTROLLER AND WHEELIE CHAIR

- Slide the power switch to ON (I) on the wheelchair chair.
- Press the pairing button on the remote controller after switching on the wheelchair chair.
- Pairing is complete when the LED changes from flashing red to solid red on the remote controller.

Pairing

Pairing is complete

**NOTE:** If the LED indicator does not stop flashing in approximately 10 seconds, switch off the wheelchair chair, turn it back on, and then press the pairing button on the remote controller to try pairing again.

#### D. STEERING ALIGNMENT

- Check the wheelchair chair's steering alignment before playing by driving it forward to see if it is driving straight.
- If the wheelchair chair automatically steers toward the right/left, press the alignment button in the opposite direction a few times until it runs in a straight line.

ALIGNMENT BUTTONS

### 4: HOW TO DRIVE

#### CHECKLIST

- Is the wheelchair chair fully charged?
- Is the remote controller equipped with fresh batteries?
- Is the remote controller paired with the wheelchair chair?
- Has the wheelchair chair's steering been aligned?

### CONTROLS

FORWARD/BACKWARD

LEFT/RIGHT STEERING

BOOST

**TIP:** Tilt the wheelchair chair back and try pulling off different tricks with the driving controls!

**NOTE:**

- Operating range of the remote controller is up to 25 m (82 ft).
- The wheelchair chair and remote controller will go into sleep mode if left idle for approximately 5 minutes. To resume normal play, press and hold the remote controller's pairing button until the LED lights up again.

### SPEED BOOST

Press the **FORWARD + BOOST** buttons, for extra speed off the ramp!

### STUNT RECOVERY

Fall down, toggle the **DIRECTIONAL CONTROLS** to get up and keep stunting!

### 360 SPINS

Press the **BOOST** button for wild 360 spins!

### CONSUMER INFORMATION

#### TIPS & HINTS – FOR ALL DRIVING ENVIRONMENTS

- When your wheelchair chair starts to lose power, it may lose functionality or performance. It's time for a recharge. For the best performance, always start with a fully-charged battery. Your wheelchair chair's running time may change depending on driving style and driving environment.
- Radio interference can make your wheelchair chair run badly. Interference can be caused by other RC vehicles running on the same frequency, electrical wires, large buildings, CB radios, or other wireless gear. To fix this issue:

- Point your remote controller up, and not down toward your wheelchair chair. If your wheelchair chair gets too far away, it won't work properly.
- Don't leave your wheelchair chair near heat or direct sunlight. Always turn switches OFF and remove all batteries from remote controller before charging.
- Don't drive your wheelchair chair in sand or through water or snow. Do not immerse your wheelchair chair in water. If your wheelchair chair gets wet, wipe it with a towel and allow to dry completely overnight. If your remote controller is accidentally dropped in water, remove battery(ies) and allow your remote controller to air dry. Replace with fresh battery(ies) before operation.
- When exposed to an electronic spark, the remote controller and/or the wheelchair chair may malfunction. To resume normal operation of the remote controller, remove the batteries and reinstall them after 5 seconds. To resume normal operation of the wheelchair chair, turn the power OFF for 5 seconds, then turn it ON again.

#### SAFETY TIPS

- Play safely! Do not drive the wheelchair chair in the street!
- DO NOT pick up the wheelchair chair while in motion!
- Keep fingers, hair, and loose clothing away from the wheels while the wheelchair chair is switched ON.
- Adult supervision is recommended when the wheelchair chair is being operated.
- To avoid accidental operation, remove all batteries from the remote controller when not in use and switch the wheelchair chair OFF before storing.

#### RECHARGEABLE BATTERY SAFETY INFORMATION

- Rechargeable batteries are only to be charged under adult supervision.
- Do not charge batteries in a fire. Allow to cool before recharging.
- Do not recharge a battery pack that shows leakage or corrosion.
- Do not disassemble the battery pack. The battery pack is a sealed rechargeable Li-Ion battery pack.
- If the battery pack and/or charging port are wet, thoroughly dry before charging.
- Do not recharge non-rechargeable batteries.
- Li-Ion battery in the wheelchair chair is not intended to be replaced or removed by consumers. Before disposal in the waste stream, the Li-Ion battery must be removed by a qualified professional and disposed of separately according to local regulations on battery collection and recycling.
- Do not dispose of the batteries in a fire.

#### BATTERY SAFETY INFORMATION

In exceptional circumstances, batteries may leak fluids that can cause a chemical burn injury or ruin your product. To avoid battery leakage:

- Non-rechargeable batteries are not to be recharged.
- Rechargeable batteries are to be removed from the product before being charged.
- Rechargeable batteries are only to be charged under adult supervision.
- Do not mix alkaline, standard (carbon zinc), or rechargeable batteries.
- Do not mix old and new batteries.
- Only batteries of the same or equivalent type as recommended are to be used.
- Batteries are to be inserted with the correct polarity (+ and -).
- Loose batteries can be removed from the product.
- The supply terminals are not to be short-circuited.
- Dispose of batteries(s) safely.
- Do not dispose of this product in a fire. The batteries inside may explode or leak.

#### FOR PRODUCT SOLD IN USA - POUR LES PRODUITS VENDUS AUX ÉTATS-UNIS

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment operates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**NOTE:** Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

Cet appareil est conforme à l'article 15 de la réglementation de la FCC.

L'utilisation de ce dispositif est autorisée seulement aux deux conditions suivantes:

- (1) Il ne doit pas produire de brouillage notable, et (2) l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.

Cet appareil a été testé et jugé conforme aux limites de la classe B pour un appareil numérique en vertu de l'article 15 de la réglementation de la FCC. Ces limites ont été établies pour fournir une protection raisonnable contre l'interférence nuisible dans une installation résidentielle. Cet appareil génère, utilise et peut émettre de l'énergie radioélectrique. S'il n'est pas installé et utilisé conformément aux instructions, il peut provoquer des interférences sur les communications radio. Cependant, il n'est pas garanti que des interférences ne se produiront pas dans certaines installations. Si cet appareil cause des interférences à la réception radio ou télévisive (ce qui peut être vérifié en éteignant l'appareil puis en le remettant sous tension), l'utilisateur peut tenter de les résoudre en suivant une ou plusieurs des mesures ci-après :

- Reorienter ou déplacer l'antenne réceptrice.
- Augmenter l'espace entre l'appareil et le récepteur.
- Brancher l'appareil sur une prise de courant différente de celle sur laquelle le récepteur est branché.
- Pour obtenir de l'aide, contactez le vendeur ou un technicien radio/télévision expérimenté.

**REMARQUE :** Tout changement ou modification de cet appareil n'ayant pas été expressément approuvé par les parties responsables de sa conformité peut entraîner l'annulation du droit d'exploitation de l'équipement par l'utilisateur.

#### FOR PRODUCT SOLD IN CANADA - POUR LES PRODUITS VENDUS AU CANADA

This equipment complies with FCC & Canada radiation exposure limits set forth for uncontrolled environments. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s).

Operation is subject to the following two conditions:

- (1) This device may not cause interference. (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Cet équipement est conforme aux limites d'exposition aux radiations définies par le Canada pour des environnements non contrôlés. Cet émetteur ne doit pas être installé ou utilisé en conjonction avec une autre antenne ou un autre émetteur.

L'émission/réception exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes:

- (1) L'appareil ne doit pas produire de brouillage; (2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
