

To: American Telecommunications Certification Body, Inc. Date: June 27, 2001

Attn: Mr. William Graff

Applicant: CIDMATE International Technology Inc.

FCC ID: PIZMH9012

We hereby would like to clarify that we did test in 3 orthogonal planes for both handset and base units of the captioned model, and the data stated in the testing report was the worst case. In addition, the maximum frequency we tested in radiated emissions was 18GHz, the noise level of harmonic under 18GHz frequencies were extremely low.
