Subject: RE: FCC ID: PIZMH9011 & PIZMH9012 (radiated data over 1GHz)

Dear Timothy,

Sorry I missed that.

I have checked the test data for this project, and found we did test both peak and average of radiated measurement data over 1000 MHz for the EUT.

But I did not show the average test data on the report because we have so limited experience on such devices that we did not know both (peak and average) needs to be on the report.

I have the test data added on the report and have it attached for your review. If you have question, please feel free to let me know.

Thanks for all your kindly help.

Have a nice day & Best Regards,

Julia/ Intertek Taiwan
