**Overall Assessment Letter for SeaTalk<sup>ng</sup> BaseStation (E02045)**  
**FCC id: PJ5-STNGB**

I have reviewed this application and find it compliant.

This is an application for a low power base station for leisure marine applications and is intended for use on non-IMO leisure craft and small workboats. The unit which interfaces to a wired Seataalk<sup>ng</sup> databus, forms part of the Raymarine G-Series navigation system.

Please note the following:

1: SAR Exemption

- The radio operates in the frequency range of 2.4 GHz to 2.4835 GHz
- The antenna gain of the radio is 4.1 dBi
- The maximum peak output power is 0.00603 W (e.i.r.p)

I underwent the FCC RF exposure evaluation training at BABT in July 2007.

Yours sincerely

Vina Kerai  
Compliance Engineer, BABT
