Dear Sir

**Subject: Applications for FCC Certificates of Approval for Raymarine a75 WIFI, a77 WIFI and a78 WIFI multifunction displays**

Please find enclosed the FCC application for the following Raymarine Displays. These are intended for use on non-IMO leisure craft and small workboats.

A75 WIFI 7 inch Chartplotter display, Part number E70166

A77 WIFI 7 inch Chartplotter display with fishfinder, Part number E70167

A78 WIFI 7 inch Chartplotter display with Downvision fishfinder, Part number E70203

These displays extend the range of Raymarine a series displays, using common CPU and sonar boards to the a65 WIFI, a67 WIFI and a68 WIFI with a larger 7" LCD rather than the 6" LCD used in the a6 WIFI range. There are minor changes to the CPU boards depending on display size or version of sonar board.

All three displays have identical LCDs, touchscreen, NMEA2000 and Seataalk<sup>hs</sup> functionality, the only exceptions is the sonar PCBs in the a77 WIFI and a78 WIFI.

If you have any queries regarding the application, please contact myself or Paul Pitt on the following:
