To whom it may concern:

Raytheon, hereby requests a Permissive Change Class II of the radio equipment certification for the DSRC Reader certification number, FCC ID: P JL6156388. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. -No changes to this section.
- (b) Functional capabilities. - No changes to this section.
- (c) Antenna Characteristics. - A third antenna type has been added.
- (d) Cosmetic differences - No changes to this section.
- (e) Other(?)

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Michael Mikasa
Principal Engineer
Raytheon
