

## Differences between antenna setup

- **ID ISC.ANT1800/700-B (actual antenna)**
- **ID ISC.ANT1520/680-B (new antenna)**

### 1. Differences between antenna setup

- **ID ISC.ANT1800/700-B (actual antenna)**
- **ID ISC.ANT1710/690-B (new antenna)**
  - The antenna plate and the shape of the 8 figure antenna conductor is smaller. We changed the total dimensions of the antenna plate from 1800mm x 700mm (ID ISC.ANT1800/700-A) to 1520mm x 680 mm (ID ISC.ANT1520/680-A).

### 2. Differences between LED-Module

- **ID ANT1690600-LED Module (actual antenna)**
- **ID ISC.ANT1520680-LED RGB Module (new antenna)**
  - The new antenna ID ISC.ANT1520/680-A have a new ID ISC.ANT1520680-LED RGB Module with seven different colors. The ISC.ANT1690600-LED Module was only in red color.
  - The communication with the reader ID ISC.LRM2500-BB and ID ISC.ANT1520680-LED RGB is realized by RS485 interface. The ISC.ANT1690600-LED Module are switch on by a relay form the reader ID ISC.LRM2500-B.
