Subject: Info Request

1) Please explain which GPRS multi-slot class and mobile/terminal class are applicable.  
<Response> The applicable class is Multi-slot Class 10; Mobile terminal B.

2) Please revise op desc exhibit, or describe how present version meets the following specs., e.g., from May03 TCB training notes:

"Exhibits - Operational description:

- Operational or technical description regarding how the device operates, is modulated and meets requirements.
- Describe the EUT completely. What is it? (in plain English as well as in technical terms). Give functional description.
- The User Manual is not a substitute for the Operational Description.
- Always describe the signal such as modulation type, pulse repetition rate, signal type, information being sent. "

<Response>

The operational description has been revised to include all info requested above. Please see uploaded new version "OpDes\_rev.pdf". Thanks.
