

4. Web Access

You can access the unit through a web browser by using the following steps:

- ① Connect an Ethernet cable from your computer to GE1 on the 5266XG.
- ② Launch a browser or telnet session and point it to **192.168.1.1**
- ③ Enter the username and password.
The default username/password is **admin/dzsi**
For security the password should be changed.

Quick Installation Guide 5266XG

Information furnished by DZS is believed to be accurate and reliable. However, no responsibility is assumed by DZS for its use, nor for any infringements of patents or other rights of third parties which may result from its use. No license is granted by implication or otherwise under any patent or patent rights of DZS. DZS reserves the rights to change specifications at any time without notice.

1. Caution

Please follow the instructions below to avoid physical injury:
You should not install the unit during a storm. Likewise you should not connect or disconnect any line to avoid the risk of electric shock.

⚠ Caution & Warning

- *This unit is indoor use and all the communication wirings are limited to inside of the building.*
- *DO NOT plug in, turn on or attempt to operate an obviously damaged unit.*
- *Never look directly at the fiber TX port and fiber cable ends when they are powered on.*
- *DO NOT use near water.*
- *DO NOT place near high temperature source.*
- *DO NOT disassemble the unit.*
- *DO NOT operate the unit in a location where the maximum ambient temperature exceeds 40°C.*
- *Open optical connections must use a protective cap under all circumstances to protect against physical damage and dirt.*
- *Before making connections, use isopropyl alcohol and non-fibrous cellulose to clean the faces of the connectors.*
- *Avoid impact stresses when handling connectors. Physical damage to the faces of optical connections impairs transmission quality (higher attenuation).*
- *Avoid a bend radius in excess of 30 mm for fiber optic links.*
- *Check the available voltage supply.*
- *Only use the unit in dry rooms.*
- *Set up the unit away from direct sunlight or other electrical equipment.*
- *Only connect approved accessories.*
- *It may only be repaired by authorized service personnel.*
- *This equipment is not suitable for use in locations where children are likely to be present.*

✓ Limited Warranty

- *Not covered under this warranty is defect and damage resulting from product disassembly by yourself. And also, such behavior may amount to intellectual property infringement.*

2. Introduction

2.1 Package Contents

- 5266XG
- Desktop Stand
- QIG (Quick Installation Guide)

2.2 Specification

Item	Specification
Uplink Interface	1 XGS-PON port (SC/APC)
Service Interface	4 10/100/1000Base-T ports (RJ45) 1 1G/2.5GBase-T port (RJ45)
VoIP Interface	2 FXS ports (RJ11)
Power Adapter	Output: 12VDC/1.5A
Operating Temp.	0 to 40°C (32 to 104°F)
Operating Humidity	5 to 95% (non-condensing)

Dimensions

2.3 Interface

Item	Description
① LEDs	Operating status LEDs.
② WPS button	Press to initiate WPS connection process.
③ Reset button	Reboot the unit or reset to factory defaults. Press and hold for 10 seconds to reset factory defaults.
④ UPS	Power connector and UPS backup power.
⑤ Power port	Connect an external power supply.
⑥ USB	Connect an external 3.0 USB drive.
⑦ POTS 1-2	Connect to VoIP phone.
⑧ 2.5GE	Connect to PC or LAN. (1G/2.5GBase-R interface)
⑨ GE 1-4	Connect to PC or LAN. (10/100/1000Base-T interfaces)
⑩ Fiber Connector	Connect optical network.

2.4 LED

Label	Light	Status	Definition
STATUS	Blue	ON	Normal Operation
		Rapid Blink (10/sec)	Unit has been reset to factory defaults /is unconfigured.
		Slow Blink	Boot-up / Initialization / provisioning in progress
BATT	Yellow	OFF	Power off
		OFF	Normal operation on AC source
		ON	Operating on Battery Power
ALARM	Red	Slow Blink (2/sec)	Battery Alarm (Low Battery, Missing or Replace)
		OFF	No major alarms
		ON	Major Alarm (including operating in battery power)
INTERNET	Blue	Slow Blink (2/sec)	SW or Config update in progress
		ON	Ranged successfully
		Flash	Ranging in progress
WAN	Blue	OFF	Not ready for ranging or not provisioned
		ON	Internet service is available.
		OFF	Internet service is unavailable. (no response from DNS server)
GE1-4/ 2.5GE	Blue	ON	Ethernet interface linked
		Flash	Data transmitting
		OFF	Ethernet interface not linked
VOICE	Blue	ON	Registered successfully
		Slow Blink (1/sec)	Off hook
		OFF	Registration failed or telephone service is not provisioned.
2.4GHz	Blue	ON	2.4GHz Wi-Fi service is enabled on ONT.
		Slow Blink (1/sec)	2.4GHz Wi-Fi data passing between ONT and connected devices.
		OFF	2.4GHz Wi-Fi service is disabled on ONT.
5GHz	Blue	ON	5GHz Wi-Fi service is enabled on ONT.
		Slow Blink (1/sec)	5GHz Wi-Fi data passing between ONT and connected devices.
		OFF	5GHz Wi-Fi service is disabled on ONT.
WPS	Blue	ON	WPS successful connection established (for 5 sec)
		Slow Blink (1/sec)	WPS in progress
		OFF	Disabled or process successfully finished

3. Installation

- ① Remove fiber service cover to expose XGS-PON port.
- ② Connect fiber optic cable with SC/APC termination to the XGS-PON port.
- ③ Re-attach the fiber service cover onto the 5266XG.

- ④ Connect the Ethernet cable from 1GE or 2.5GE port to PC.
- ⑤ Connect the telco cable from POTS port to home phone lines.
- ⑥ Connect the power cable from power port to an electrical outlet.
- ⑦ (OPTIONAL) Connect the Battery Backup Unit power and telemetry to the UPS port.

UPS Connector Pinouts

Pin	Signal	Comments
1	+VDC	Power in from UPS
2	-VDC	Power return to UPS
3	On Battery	Open signal when on battery power
4	Signal Return	Connected to Signal GND on ONT
5	Missing Battery	Open signal when battery not detected
6	Replace Battery	Open signal when battery should be replaced
7	GND	Connected to Signal GND on ONT
8	Low Battery	Open signal when battery is low

Mounting on a Wall

If necessary, you may have your ONT mounted on a wall using mounting holes.

Wall mount when using a fiber tray

If necessary, you may have your ONT mounted on a wall using fiber tray.

- ① Mount a fiber tray.
- ② Wrap extra fiber around the fiber spools in a counter clockwise direction, making sure there is enough flexibility for the fiber to connect to the 5266XG without bending the fiber tighter than a 30 mm radius.
- ③ Attach the 5266XG to the fiber tray.
- ④ Connect the optic cable to the XGS-PON port.

FCC STATEMENT:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body

INDUSTEY CANADA STATEMENT:
This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device. In additional, this device complies with ICES-003 of the Industry Canada (IC) Rules.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Industry Canada licence-exempt RSS standard(s). These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
This equipment complies with RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body

INDUSTEY CANADA STATEMENT(French):
Cet appareil est conforme aux normes RSS exemptes de licence d'Industrie Canada. Son fonctionnement est soumis aux deux conditions suivantes : (1) Cet appareil ne doit pas causer d'interférences nuisibles et (2) cet appareil doit accepter toute interférence reçue, y compris les interférences susceptibles de provoquer un fonctionnement indésirable de l'appareil. De plus, cet appareil est conforme à la norme ICES-003 des règles d'Industrie Canada (IC).
Tout changement ou modification non expressément approuvé par la partie responsable de la conformité pourrait annuler l'autorité de l'utilisateur à faire fonctionner l'équipement.
Remarque : cet équipement a été testé et déclaré conforme aux limites d'un appareil numérique de classe B, conformément aux normes RSS exemptes de licence d'Industrie Canada. Ces limites sont conçues pour fournir une protection raisonnable contre les interférences nuisibles dans une installation résidentielle. Cet équipement génère des utilisations et peut émettre de l'énergie de radiofréquence et, s'il n'est pas installé et utilisé conformément aux instructions, peut causer des interférences nuisibles aux communications radio. Cependant, il n'y a aucune garantie que des interférences ne se produiront pas dans une installation particulière. Si cet équipement cause des interférences nuisibles à la réception radio ou télévision, ce qui peut être déterminé en éteignant et en rallumant l'équipement, l'utilisateur est encouragé à essayer de corriger l'interférence par une ou plusieurs des mesures suivantes :
-Réorientez ou déplacez l'antenne de réception.
-Augmenter la distance entre l'équipement et le récepteur.
-Connectez l'équipement à une prise sur un circuit différent de celui auquel le récepteur est connecté.
-Consultez le revendeur ou un technicien radio/TV expérimenté pour obtenir de l'aide.
Cet équipement est conforme aux limites d'exposition aux rayonnements RSS-102 établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec une distance minimale de 20 cm entre le radiateur et votre corps.

Note: This device does not support 5600MHz-5650MHz in Canada.
