Subject: SKYZHONE-1424, Wi-Fi Access Point

FCC ID # PJZSZ1424

To: Whom It May Concern:

To insure conformance of the SKYZHONE-1424, Wi-Fi Access Point to C.F.R. 47, Part 90 FCC rules, in production the product uses preset maximum Radio Tx Power output values that are not accessible to the end Customer. The only capability the Customer has is to reduce Tx Power Levels below these 100% maximum preset levels, as this may be desirable in congested areas. No means are provide to increase the Tx Power Levels above the 100% limit. This will insure conformance for all available 802.11 a channels.

Should you have any questions or require any further information with regards to this, please fell free to contact me.

Sincerely,

Chuck Coston
(Sr. Engineer)
