Subject: MPR Attestation

FCC Certification No: **PKRNVWE351**

Novatel Wireless declares the following:

- 1) The LTE Maximum Power Reduction (MPR) is a mandatory feature that is built-in by the design. The feature is permanent and cannot be changed by the end user or the network operators.
- 2) The LTE MPR meets the applicable 3GPP TS 36.101 technical specification requirements (Table 6.2.3-1). MPR targets and maximum output power is permanently limited for the configurations specified in this table:

Modulation	Channel Bandwidth/Transmission Bandwidth Configuration (RB)		MPR (dB) Target	MPR (dB)
	BW			
QPSK	5MHz	10MHz	1	≤ 1
16QAM	>8	>12	1	≤ 1
16QAM	≤ 8	≤ 12	1	≤ 1
16QAM	>8	>12	2	≤ 2

- 3) The device was tested for SAR with A-MPR disabled
- 4) The device cannot transmit as a higher power than identified in the Tune up procedures.

Sincerely,
