Re: Dell Latitude XT3 Tablet Convertible PC, Regulatory Model-Type P17G-P17G001

To whom it may concern:

This product has been modified so that in the tablet mode, the LCD of second landscape orientation is *disabled* when using WWAN radios. This is to prevent the end users from using the tablet in this position where the WWAN antennas would be in direct contact with the user's body.

This condition is being considered in SAR testing or MPE calculation of the product.

Sincerely,

Todd Bath
Regulatory Compliance Engineer
