Re: Class II Permissive Change Request: FCC ID: PKRNVWE725  
Model Number: E727

Dear Sirs:

The applicant request that a Class II Permissive Change Grant be issued per §2.1043(a)

The reason for this request is the replacement of a frequency determining component that satisfies the definitions in the FCC Permissive Change Policies document No. 178919 Dated 10/28/2008. The component is an oscillator that operates at 19.2 MHz.

Ref: 178919: 2 (c) – The part is electrically identical to that which it is replacing  
178919: 2 (c)(i) – The part is pin for pin compatible to that which it is replacing  
178919: 2 (c)(ii) - The part has the same basic function as the part it is replacing  
178919: 2 (c) (iii) – No change in radio parameters has occurred

Sincerely,

Jim Turner
