

25 May 2016

This is to confirm that the following changes have been made to the grant for FCC ID: PKTNODEBBFZ:

- Listed emission designators were updated to detail the emission bandwidths as 6 MHz and 12 MHz, in line with the advice given in the Test Lab KDB Inquiry, uploaded as part of this filing, instead of the measured Occupied Bandwidths of 4.5 MHz and 9.0 MHz.
- The grant notes have been updated to indicate that the power listed is a conducted value instead of an EIRP value and a grant note has been added stating that the maximum antenna gain is limited to 20 dBi.
- Grant note M4: *Operation of this unit is limited to use at stations licensed for use under Part 74 of FCC Rules.* has been added.

The grant was changed on 25 May 2016.
