Superseding of Part 27 Test Report Exhibit : “Test Report” (RFI/RPTE1/RP49131JD01A)

Re: FCC ID: PKTNODEBVS

Exhibit “Test Report Rev” (RFI/RPTE3/RP49131JD01A) supersedes original “Test Report” (RFI/RPTE1/RP49131JD01A). The report has been re-issued to correct text errors, including incorrect transmitter power output listing of 34.0dBm in results summary table on page 7. The power output measurement of 37.3dBm was correctly listed in the results page 17. This is the correct power value listed in the Grant (5.37W).

A handwritten signature in black ink, appearing to read "J. Bellairs". The signature is written in a cursive, flowing style.
