Notice_content

Question #1: EUT is equipped with PS/2 connector. However, the page 4 of 13 of

test report indicated the external connector is USB. Please make necessary correction and submit revised report.

Question #2: This device

is tested in accordance to the guide line given in ANSI C63.4 as Personal computer peripheral. There is no radiated emission data were included in the test report which is supported by the statement "It was not observed any emissions from the EUT during the above test.". Please note: during the radiated emission tests for Personal Computer peripheral, you are required to report the spurious emission from the devices that EUT is connecting to. Please redo the radiated emission test from 30 - 1000 MHz and report the six highestest all within 20dB of limits.

Best Regards

Mike Kuo / TCB Certifier

The items indicated above must

be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
