Re: Linksys Group Inc.  
FCC ID: PKW-BEFCMUH4

Dear Timothy:

To: Mr. Timothy R. Johnson,

In responses to your ATCB comments on 2003/3/31.

Q1 and Q2: New update manual, See up-loaded file

Q3: They are always packaged together when export (sold). So, we change label statement.

See attached format of label.

Q4: Applied to current limits.

Q5: I had been answering your question on 2003/3/31. Now, I re-explain VBW and RBW of the plots.

Firstly, the band-edge plots apply to VBW=RBW= 100KHz then perform radiated emission testing in PKW-BEFCMUH4. (Peak Mode : VBW=RBW= 1MHz , Averaged Mode: VBW=1MHz and RBW= 10Hz.)

Best regards,

Jack Tsai
