

Dear Tim:

1. PCMCIA only one single ANT. Updated block & schematic. (2 files)
2. Output power 16.3dBm Updated operational description & form 731. (2 files)
3. Corrected the MPE calculations. (1 file)
4. Because the EUT shielding by metal cabinets.

We confirm again that there was no >1 GHz spurious data.

Thank you very much !

TRC Jacob Lin
