

Dear Ms. Mccann,

I could speak with Ms. Park at Tokin EMC Engineering and she kindly informed me below so please refer it.

The computer used during the test at their facility has no FCC ID nor Doc itself. Because it is very hard to find the computer as the completed product which complys with the FCC so Tokin EMC collected/bought the parts/components which comply with the FCC and assembled the customised computer by themselves. She also said FCC would accept it if the computer consists of the components/parts which has the FCC ID or Doc. The page number 4 in your last mail's attachment shows most of the parts have them except Speaker and Adaptor. She also said the FCC doesn't require the FCC ID or DoC to these two parts. So Tokin EMC judged this report would meet with the FCC.

I hope this reply would help and solve the matter.

Should you have further inquiries, please let me know.

Best regards,

Subject: Re: Assistance from CS in UL Japan

Dear Mr. Hirose,

Thank you so much for such a quick response, attached are 4 original documents from TOKIN concerning the project in question. #1- The proof of conformity has Tokins test report number which may help them find the project. #2- Description of Device. #3-Test Facility and Summary of results, this also has the report writer and the testing engineers name at the bottom. & #4-Tested System Details, this paper should state the FCC ID number for the computer that was used during the testing process or indicate if it was DOC'ed, this is the information I need to resolve this situation.

I listed the information the FCC is requiring at the bottom of the "tested system details" document.

TOKIN.tif

Please ask that the information requested be sent to me As Soon As Possible. Would it be possible to have current information and contact information from TOKIN to keep on file.

Mr. Hirose,

Once again thank you so much for your help in this unusual situation, your extra efforts are greatly appreciated !!!!! It has been a pleasure working with you and experiencing first hand the team work and professionalism of UL's CSP's all around the world

Dear all,

I have just contacted Mr. Fukuda at Tokin EMC Eng. but unfortunately he is out of office by the business trip today. I heard his fax number so I will send this inquiries and I will let you know when I hear from him. Please wait at least on Monday morning.

Best regards,

Subject: FCC info added to letter

Dear Akira Kamada,

My name is Lyn McCann, with Underwriters Laboratories in Camas Washington (West Coast Division). Our EMC department takes on various projects, one of which is being a

Telecommunications Certification Body (TCB). We provide the Federal Communications Commission (FCC) with the necessary documents and information to issue FCC Certification (or grant) to companies who market products in the U.S. If the FCC should need information or have questions concerning an issued grant, UL is contacted.

We recently received a request for information from the FCC about a grant issued to a company in Japan who's device was tested by "Tokin EMC Engineering Co., Ltd". We have made multiple attempts to contact this company over the past 2 weeks and have been unsuccessful.

We are requesting your help in trying to contact this company. The FCC gives UL 30 days to submit the requested information. In the event that the information is not submitted within these guidelines, the grant will be dismissed. We have listed below all the information we have on file for the company. Could you please assist us in contacting this company and express the importance of the required information. It is **urgent** that we receive an immediate response from either the chief engineer listed below or someone else who is knowledgeable with EMC equipment and procedures.

#### **Information requested by the FCC:**

Please provide the FCC ID number for the computer used during the testing, or indicate if it was Declaration of Conformity (DOC) was used.

#### **Technical contact:**

Firm Name, TOKIN EMC Engineering Co., Ltd  
Contact person, Mickey Fukuda / Assistant manager  
Address, 28-1, Kitahara-aza Hanashimashindenohaza  
Tsukuba- city, Ibaragi 305-0875  
Japan.  
Phone, #1 81-298-37-2400  
#2 81-298-37-2490

#### **Non-Technical contact:**

Contact person, Park, KEUM

Firm,  
Address information same listed above  
Phone

Chief Engineers Jeong, Tae Vo  
Hiro Shida

I appriciate your assistance in helping to resolve this issue.

Best Wishes,
