

Martin,

In accordance with your proposed method detailed in item 1 of correspondence 24202, the SAR validation testing was performed with both head and body liquids. This data has been uploaded for your review.

The additional SAR data requested for different antenna positions has also been performed on the worst case hosts and frequencies. This data has been uploaded for your review.

SAR testing was performed by Qualcomm SAR specialist John Forrester using the SAR system and facilities of Bay Area Compliance Lab Corp. (BACL) located in Sunnyvale, California. All testing was performed in accordance with P1528 and FCC OET Bulletin 65 standards.

Thankyou

Paul Guckian
