Thanks Dennis,

I am uploading the docs as you suggested. I have included parts list for the Syn, PA, and If cards.

I tried uploading before but I do not believe they made it. I will do it again. Note I am adding the block diagram and the parts list to the conf. letter.

Again, thank you for your attention. Let me know if you need anything else, but I believe this should do it!

Thanks,

Brian Sutton

Hi Brian

These manuals do get kinda large don't they. I had to ask because the FCC says they want the complete manual unless it is not practical. I think when the manual is over 8 meg we can justify using a cover letter stating the size of the manual is too large for digital applications. Up to 8 meg they should be provided in two or more files smaller than 3.8 meg each. If your manual is larger than 8 meg, let me know by providing a letter stating that the manual is available upon request. Be aware however, that the FCC may ask for the manual anyway. At that time you can mail the paper copy to them.

I can accept the PA parts list. Again, the FCC may ask for the whole parts list. At that time you can then provide it via digital upload.

Remember, if any of this information (manual excluded) is

confidential, you will have to provide a revised Confidentiality letter.

Thanks
Dennis.
