

MH370 Stereo Bluetooth Headset

Hua Zhihui (HZ) Communication Technology Co., Ltd.

# Quick Start Guide

MH370 Stereo Bluetooth Headset

## Introduction

With Bluetooth wireless technology, MH370 gives you the convenient wireless way to enjoy the streaming stereo music transmitted from the Bluetooth A2DP<sup>1</sup> device such as mobile phones, mp3 player, PCs or PDAs in the available range.

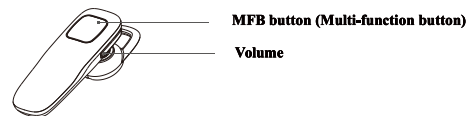

Moreover, you can use MH370 to remote control the music playing functions of your Bluetooth device that supports Bluetooth AVRCP<sup>2</sup>.

Switching between music and phone calls, MH370 also allows you to answer or make calls with the Bluetooth-enabled mobile phone<sup>3</sup> while you are listening to music. After you ended the call, the music will follow to be streamed in a few seconds<sup>4</sup>. Besides the wireless stereo and mobile hands-free applications, you can apply the MH370 to the Bluetooth-enabled PC<sup>5</sup> with the Internet messenger such as Skype, MSN Messenger or Yahoo! Messenger.

Notes:

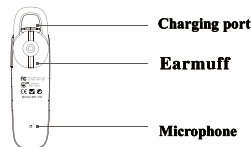

- 1** The playback or its plug-in Bluetooth adapter/transmitter needs to support Bluetooth A2DP (Advanced Audio Distribution Profile).
- 2** The playback or its plug-in Bluetooth adapter/transmitter needs to support Bluetooth AVRCP (Audio Video Remote Control Profile).
- 3** The mobile phone needs to support Bluetooth HSP (Headset Profile) or HFP (Hands-free Profile) and support Bluetooth A2DP (Advanced Audio Distribution Profile).
- 4** Some mobile phones do not release the connection switch function to the headset, which will cause the headset to fail to switch the Bluetooth connection between music and call.
- 5** The computer or its plug-in Bluetooth adapter needs to support Bluetooth HSP (Headset Profile).

## How to Charge this Bluetooth Headset

The Bluetooth headset MH370 has Built-in rechargeable battery. Before using for the first time, you have to fully charge the battery for 2-3 hours.

MH370 can provide 6-9 hours of listening time and over 150 hours of standby time.

## Charging Instruction

- 1) The RED LED will flash continuously when battery power is low.
- 2) Connect the power charging ports with a power source (USB charger or AC charger). When charging, the RED LED will be on.
- 3) When the headset is fully charged, the BLUE LED indicator will be ON. Disconnect the charger from the power source.

## How to use Bluetooth Headset along with your mobile phone

### Power on

When the headset is off, long press the MFB button until the blue LED flickers to turn it on.

### Enter pairing mode

When the headset is off, long press the MFB button until the blue and red LED flicker alternatively. It means the Bluetooth Headset is in Pairing Mode.

### Pair with the Mobile Phone

Pairing is the process of linking the Bluetooth Headset with your Bluetooth device (for example, a mobile phone). Before you use Bluetooth Headset with your Bluetooth mobile phone, you must pair the mobile phone with your headset. After the first time they get paired, next time you just need to turn the headset on and off when you need it. It will automatically reconnect when you turn the headset on (make sure your mobile phone Bluetooth function is on).

If you wish to use the headset with another mobile phone, you must repeat the pairing process with the new mobile phone, in this case, the Bluetooth Headset will no longer work with the former mobile phone.

Please follow the below steps below or pairing:

- 1) When the headset is off, press and hold the MFB button until the red and blue LED flash alternatively. Make sure your Bluetooth mobile phone is on, and its Bluetooth function has been activated.
- 2) Follow the operating instruction of your Bluetooth mobile phone to start the pairing process. Typically, this is done by going to a "Connect" or "Setup" menu and then selecting the option to search the MH370 that is still in the pairing mode.
- 3) The mobile will find device name MH370 and ask whether you are willing to connect your mobile with the headset. Press "Yes" or "Confirm" to confirm this action. If necessary, input the password "0000".

### Receive a Call

When there is an incoming call, press the MFB button of the headset to answer it.

2

### End a Call

Press the MFB button to end it.

### Reject incoming call

When there is an incoming call, press and hold the MFB button and you will hear a prompt tone from the headset. The call is rejected.

### Redial a call

In the standby mode, to redial the last outgoing call number, press the MFB button twice and you will hear 1 beep.

### Voice Dialing

In the standby mode, press the MFB button for 2 seconds then release. You will hear prompt tone from the headset, say the voice tag. (Please check whether your mobile phone is equipped with voice dialling function and support Bluetooth Handsfree Profile. Before using the function, make sure you have record a voice tag into the mobile phone).

### Power off

Press the MFB button until the red light flickers, the device is powered off.

### Trouble-shooting

If you are unable to connect your Bluetooth Headset with your Bluetooth audio device, please try the following:

- Ensure your headset is turned on and is properly charged.
- Ensure the Bluetooth headset is in pairing mode when you try to pair it with your mobile phone. If the headset is left with blue & red LED flashing alternatively but not being paired for over 3 minutes, the headset will be shut off automatically. You have to turn off the headset then enter the pairing mode again.
- Ensure the Bluetooth dongle or other device is paired with your stereo Bluetooth headset.
- Ensure your device is Bluetooth activated. Please refer to your device's user manual for instruction.
- Ensure the headset is within a maximum 10 meters (about 30 feet.) of your Bluetooth device and there are no obstructions, such as walls or other electronic devices in between.

If the above suggestions do not solve your problem, please recharge your MH370 and Bluetooth audio device for a while, then start pairing again.

## **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
