Warranty policy
Gigastone provides replacement or repair services to our customers for defective products within the applicable warranty period.

Limitation of warranty
Please note that Gigastone is not responsible for providing free repairs if the product defect is caused by any of the following factors:

1. Damage caused by natural calamity or any inappropriate usage.
2. Product has been repaired or taken apart by unauthorized technicians.
3. The warranty label is altered, damaged or missing.
4. Product serial number does not conform to our original system or the label has been damaged.
5. Products purchased from unauthorized agents. This limited warranty covers only repairs or replacements of Gigastone products. Gigastone is not liable for any loss of data or any cost incurred from determining the source of system problems, removing, servicing or installing Gigastone products.

Caution

- Observe the following cautions carefully to avoid damage, fire, or burst of the product:
- Do not attempt to disassemble, modify or repair the product by yourself.
 - Do not drop or hit this product. Doing so may damage the product.
 - Do not expose the product to any of the following environments:
 - In a dusty place
 - In a car exposed to sunlight, a place exposed to direct sunlight, or a place that becomes hot
 - In a moist place or a place where condensation may occur
 - In a place where a magnetic field is generated

Certifications

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
