

## Statement of differences between Remote Receiver Clock WS295 and WS290C

Below is the comparison between the new model WS295 and the approved (PLJWS290C) model WS290C.

### Similarities

- Both models share the identical plastic housing, keys
- Both models utilize the same RF receiver module, located in the same orientation and location inside the plastic housing
- Both models has the same construction of the internal receiver antenna
- The operation duty cycle, operation frequency and modulation / bit rate are identical
- The main processor circuit board has similar size and component layout
- Both models operate on the same power source (2 x AA size battery)

### Differences

- Minor differences in the pattern of LCD display due to different features
- Different colour of plastic housing / keys
