

Description of variants of product

Date: 2018-11-16

Subject: Description of variants of products (FCC ID: PMLEDGEAC, IC: 6140A-EDGEAC)

I confirm that the six variants of tubular motor bidirectional radio inside (FCC ID: PMLEDGEAC, IC: 6140A-EDGEAC) have identical internal circuitry and radio.

The schematic is same for all versions of tubular motors and radio, the change is related to mechanical gearmotor.

The rappresentative tested modell is E EDGE MI 632 AC BD

The derivated models are coded with this schema:

• E EDGE xl yyyy AC BD (x = M or S; yyyy = 332 or 632 or 620 or 1012 or 1020)

the codes are defined below:

M = medium tube, diameter 45mm S = small tube, diameter 35mm

332 = 3Nm, 32rpm632 = 6Nm, 32rpm

620 = 6Nm, 20rpm

1012 = 10Nm, 12rpm

1020 = 10Nm, 20rpm

Sincerely,

By:

Mr. Enrico Campion
