November 4, 2008

Dear Examiner:

The ATR-9180 is a RFID device used exclusively in semiconductor factories and not for the general public. The ATR-9180 is marketed through Asyst Marketing staffs and can only be purchase through Asyst Technologies, Inc.

Installation of the ATR-9180 can only be done by engineers and technicians trained by Asyst Technologies, Inc. The antenna for the ATR-9180 is designed by Asyst Technologies, Inc specifically for the ATR-9180. Substituting a different antenna will cause the ATR-9180 to not function as intended. In addition, the software required to operate the ATR-9180 is designed by Asyst Technologies, Inc and can only be installed by trained engineers and technicians.

Thank you for your attention. Please let the undersigned know if the Commission disagrees with our position or requires further justification.

Sincerely,

A handwritten signature in black ink, appearing to read "Yolanda Ma", with a long, sweeping horizontal line extending to the right.

Yolanda Ma
Product Manager
